Benefits of Complete Precast Solutions

- **Speed of Construction:** Your building gets erected much quicker than other building systems. And, when the structure is complete, so is your façade, saving even more time on your schedule. Accelerated structure installation provides earlier access to an enclosed environment for all trades.

- **Strength and Durability:** Precast concrete is virtually maintenance-free, providing a versatile and resilient solution for the long-term demands of your building structures. It also exceeds provincial fire ratings.

- **Sound Resistant:** Precast concrete acts as a natural sound barrier, making for more quiet, comfortable living spaces.

- **One Supplier:** The Fritz-Alder Precast team provides the product and installation for the entire structure, eliminating the need for multiple trades on site.

- **All-weather Installation:** Unlike other products, precast concrete can be installed in cold weather, eliminating temperature-related delays.

- **Controlled Casting Conditions:** Casting concrete in a climate-controlled environment ensures a consistent finish and high-quality, precise product.

- **Versatility:** With precast, there are infinite options when it comes to colours and textures to customize a unique finish for your building. Brick, stone, ribbed, stained, textured or smooth, there are hundreds of molds to choose from.

Why Choose Complete Precast Solutions?

Your Single Source Supplier

Complete Precast Solutions are a combination of our structural and architectural products, using the most durable and aesthetically pleasing components.

With Fritz-Alder Precast, the façade is installed simultaneously to the structure, reducing construction time. Once the product is installed, the exterior is complete, not requiring additional masonry work.

Advantages of partnering with Fritz-Alder Precast

Because no two precast projects are the same

You need a precaster with significant experience in fabrication and installation. Fritz-Alder Precast, working with some of the most prominent designers and engineering firms, meets requirements of the most discerning customers.

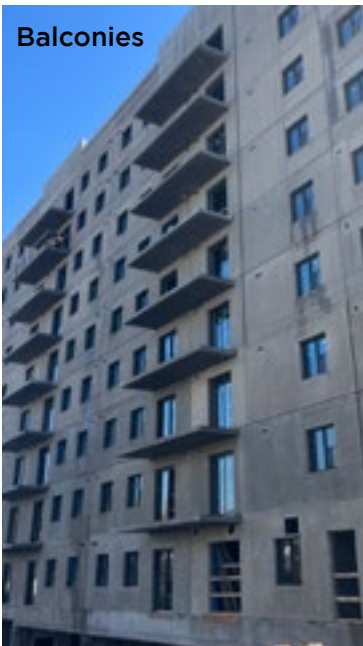

We provide our customers with one-stop, **complete structure solutions**, beginning from footings and ending with the top of the roof.

Products

Acquiring all products from one supplier enables Fritz-Alder Precast's team to design the most cost-effective and logistical solution for multi-level buildings. Fritz-Alder Precast can provide all of the necessary components for your building, including:

- Foundations
- Balconies
- Columns & Beams
- Stairs & Landings
- Hollowcore slabs
- Wall Panels
 - Load bearing
 - Architectural
 - Insulated
 - Non-insulated

Balconies
